

**I CLAIM:**

1. A replaceable bedding structure for double uses in winter and summer, comprising:

a body; and

5 a cover encasing the body having a bottom cover and a upper cover coupling with the bottom cover;

wherein the bottom cover has an opening and a coupling section located on the periphery of the opening, the upper cover having a base, a plurality of spaced blocks laid on the base interconnected by connection threads, and a connecting section located on the outer periphery of the base to engage with the coupling section so that the upper cover and the bottom cover are coupled to encase the body.

10 2. The replaceable bedding structure of claim 1, wherein the blocks are flat bamboos.

3. The replaceable bedding structure of claim 1, wherein the coupling section and the connecting section are zippers.

20 4. The replaceable bedding structure of claim 1, wherein the blocks are spherical balls.
